## Fuel Flow Management System

Consists of a digital fuel gauge and fuel flow transducer that monitors and measures fuel as it is being used, providing instant readings of not only what has been used but more importantly, how much is left. Other features include a selectable "low fuel alarm," trip log and total fuel consumed log. Fuel Flow is measured in .5 to 34 gallons/hour. This system is for use on gasoline engines.

## StingRay -XP II Hydrofoil

OUR BEST SELLING HYDROFOIL!

Hydrofoil Stabilizer now made with Speed-XP™, an extreme performance hydrophilic material, making the worlds fastest hydrofoil stabilizer even faster! Saves Fuel!

Speed-XP™ is a clear hydrophilic (water-absorbing) material that is thermally bonded to the base polymer material of the hydrofoil. The surface of this material is hard when dry—however when the surface becomes wet... Speed-XP™ acts like a microscopic sponge when wet and will bind a very thin layer of water to the surface of the hydrofoil. The result is running water on water—a dramatic reduction in hydrodynamic drag and improved performance

## Suck Up Vacuum Pump Liquid Transfer Unit

Perfect for draining oil, coolant, bilges, watertanks and any trapped liquid in a boat. Holds 2.5 gallons.  
our price  
**\$74.99**  
No. ALL SUC01

## JABSCO Flat Tank Oil Change System 3.5 Gallon Sealed Container

Now there is no need to worry about top heavy packaging or spills from openings on the container. This 3-1/2 gallon compact self-contained unit has a self-priming diaphragm run dry pump design with an easy pour spout for emptying. This design allows the unit to be stowed easily in deck boxes, boat storage lockers or RV storage compartments. The unit comes with a dipstick suction tube, battery clamp leads and an on-off switch to make the pumping process simpler and easier.
